

INTRODUCING THE AQUA 600+ SYSTEM

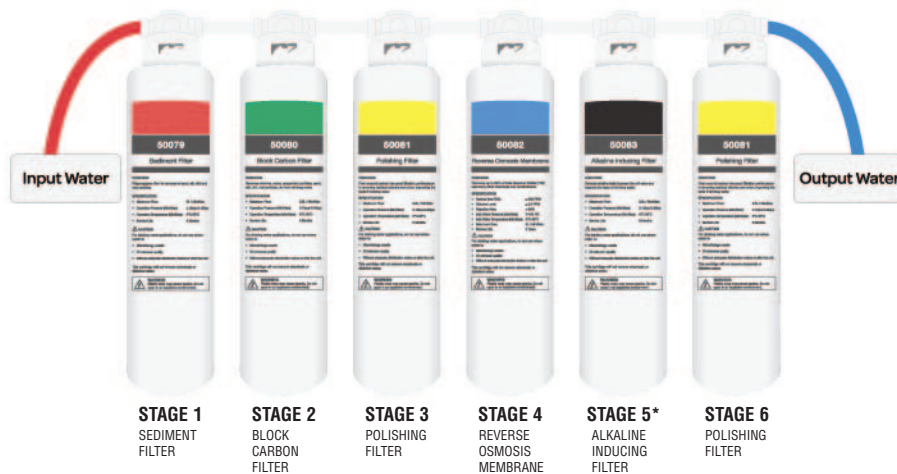

Enjoy an abundant supply of clean, clear,
ALKALINE water at your fingertips.

AQUAKLEEN®
WATER REFINEMENT SYSTEMS

THE KLEEN CHOICE IN REVERSE OSMOSIS

Exclusively from Aquakleen,
Advanced 6 Stage Reverse Osmosis

Considered among the great technological breakthroughs of this century, Reverse Osmosis processes water at the molecular level. Treatment by Reverse Osmosis represents a big step above filters of any type. You can feel confident that the full spectrum of impurities are removed including those excess dissolved salts. That's why major bottled water companies use it.

We have combined this fantastic Reverse Osmosis process with other quality components to create a compact drinking water appliance that fits neatly under your kitchen sink.

By squeezing ordinary tap water (using your house water pressure) against a special membrane, pure water molecules are separated from impurities. What's even more impressive is that these rejected impurities are automatically rinsed down the drain leaving bottled quality water for you that's clean and delicious.

It provides you with an abundant supply of the highest quality water from its own attractive spigot. We can even hook up your icemaker and refrigerator water dispenser!

* Optional Alkaline filter to elevate water PH

System components are tested and certified by the Water Quality Association to NSF/ANSI Standards.

**CLEAN, CLEAR, GREAT TASTING WATER
AT YOUR FINGERTIPS!**

- Fresh Tasting Juices & Other Beverages
- Safe & Healthy Baby Formulas
- Clean & Delicious Water For Drinking & Cooking
- Ideal For Low Sodium Diets
